Carrer Objective

Detail-oriented Junior Game Developer completing a degree in Software Industry and Multimedia. Skilled in utilizing Unity, C#, and Blender to develop and optimize high-quality games. Passionate about translating creative concepts into playable realities and contributing to robust, user-focused software solutions.

Education

Bachelor of Science, **Software Industry and Multimedia**, Alexandria University (June 2027)

Grade: Very Good

Internships

Game Development Intern *Digital Egypt Pioneers* July 2026 – Present

- Programmed functional UI systems, including a dynamic main menu with scene management and settings configuration, using Unity and C#.
 - Engineered core gameplay mechanics, including player controller logic and collision-based collectible systems.
 - Designed and sculpted 3D game environments and playable maps utilizing Unity Terrain tools.
-

Projects

TimeRewind (Time-Manipulation Puzzle Game) | Developer *In Development* 2027

- Currently developing a puzzle-adventure game centered around a custom time-reversal mechanic.
 - Engineering systems to record and reverse environmental states, allowing players to interact with past objects to prevent future disasters.
- Tools: Unity, C#, Blender.

ArcField (Auto-Battler Strategy Prototype) | Co-Developer *University Project* 2026

- Developed a grid-based auto-battler game featuring AI opponents and an automated combat system.
- Programmed three distinct unit classes (Tank, Ranged, Mage) with unique combat behaviors and mechanics.
- Implemented an A* (A-star) pathfinding algorithm to ensure units navigate the grid and engage enemies efficiently.
- Integrated external 3D assets to rapidly prototype and test core gameplay loops.

- **Tools:** Unity, C#.
- **Link:** github.com/Kirto75/Arcfield

Dunty (3D Action Roguelike Prototype) | Co-Developer *University Project*

2024

- Engineered responsive 3D player movement and camera controls using Unity and C#.
- Programmed simple enemy AI behaviors to create interactive combat encounters.
- Integrated pre-made 3D assets and animations into the engine to construct a functional testing environment.
- **Tools:** Unity, C#.
- **Link:** github.com/Kirto75/Dunty

Skills

TECHNICAL SKILLS

- **Programming Languages:** C# (Proficient), Java (Familiar with), Python (Familiar with), Flutter (Basic understanding)
- **Game Development:** Unity 3D & 2D (Proficient), Godot (Basic understanding)

TOOLS & PLATFORMS

- **3D Modeling:** Blender (Familiar with)
- **Version Control & Management:** GitHub (Proficient), Notion (Proficient)

LANGUAGE SKILLS

- **Arabic:** Native
 - **English:** *Very Good*
-
